Attention Business Editors:
^GWR intercepts 0.563 grams gold and 0.285% copper over 80 metres@

VANCOUVER, Oct. 6 /CNW/ - GWR Resources (GWQ - TSX Venture) is pleased to announce the results of the first 2006 drill hole from the Aurizon Zone at the

Lac La Hache property, BC.

DDH AZ-06-01, drilled at 60 degrees, azimuth 300 degrees, has intersected significant mineralization over 303.89 metres true length. The hole was suspended when the capacity of the drill rig was reached, but still in the

sulphide-bearing lithology. AZ-06-01 was drilled to test at depth, native copper mineralization on surface, which was uncovered by surface trenching.

Four additional north-south trenches, located to the west of the collar, spaced approximately 50 metres apart, all exhibit similar mineralization at

surface. The zone is open on three sides, and at depth.

Assay result highlights are shown in the following table.

<<

From	To	Length (m)	Au (g/t)	Cu (%)
35.29	115.73	80.437	.563	.285
140.01	148.66	8.651	.942	.277
161.75	208.53	46.782	.385	.194
229.48	272.19	42.705	.403	.227
272.19	292.32	20.135	.821	.476

>>

Average grades from 35.29 metres to 292.32 metres (257.032 metres) are 0.439 Au(g/t), and 0.223 Cu (%).

DDH AZ-06-01 is the first hole drilled in the 2006-2007 program, wherein the main focus is to evaluate anomalies in an airborne gamma-ray spectrometric

survey conducted by the Geological Survey of Canada, in partnership with GWR

Resources. (See news release of October 11, 2005)
DDH AZ-06-02 will be collared 20 metres south and 60 metres west of
DDH AZ-06-01, and drilled at 70 degrees azimuth 300 degrees, positioned
to
evaluate further the surface expression of native copper mineralization
in the
zone. Based upon these two holes, DDH AZ-06-03 will be positioned and
drilled
at 90 degrees to test the vertical extent of the mineralization.
This first 2006 drill hole was funded in part by the MineralFields Group
through a private placement. Additional drilling will largely be funded
by the
MineralFields Group through the \$3,000,000 private placement which closed
on
September 20, 2006.
The Company has entered into a written agreement with Connors Drilling
Ltd. of Kamloops B.C. to provide drilling services commencing October 11,
2006.
The Company is pleased to announce that Kevin Bay has agreed to join the
Board of Directors.
